BREEZE INFLATABLE HALF ARCH

INFLATABLE DISPLAYS

PRODUCT CODE: BRZ-HALF-ARCH

INDOOR USE | OUTDOOR USE

PRODUCT DESCRIPTION

Create an eye-catching entrance, pathway marker, or event display with the Breeze Inflatable Half Arch. Measuring approximately 101.2” W x 149.6” H x 31.5” D (8.4’ W x 12.5’ H x 2.6’ D), this large-format inflatable is designed to deliver high visibility at outdoor events, promotions, races, festivals, and branded activations.

Use the Half Arch on its own for a distinctive display, or pair two Half Arches together for the full archway effect. The inflatable frame sets up quickly using an electric air pump and features a sealed-air design, so the pump does not need to remain connected during use. Once inflated, simply disconnect the pump and position the display where you need it.

For added stability outdoors, the Breeze Inflatable Half Arch includes ropes and stakes to help secure it in place.

**For outdoor inflation of the frame where a power outlet is unavailable, we recommend utilizing a portable power generator to power the electric air pump. Alternatively, a power inverter for vehicle 12V outlets is also an effective solution*

DISPLAY DIMENSIONS

101.2” W x 149.6” H x 31.5” D	8.4’ W x 12.5’ H x 2.6’ D

GRAPHIC MATERIAL

500D UV Resistant Dye Sub Inflatable Tent Fabric

GRAPHIC FINISHING

Each printed graphic is carefully stitched with reinforced seams for durability and a clean, professional finish. The edges are double-sewn to prevent fraying and ensure a snug, smooth fit when zipped onto the archway. This craftsmanship guarantees a long-lasting, wrinkle-free display that looks sharp at every event.

DISPLAY CONSTRUCTION

Thermoplastic Polyurethane (TPU) Inflatable Archway Frame

WIND SPEED RATING	25-31 MPH Beaufort Wind Scale Rating 6
POWER OUTLETS REQUIRED FOR ELECTRIC PUMP	(qty 1) 110V power outlet
