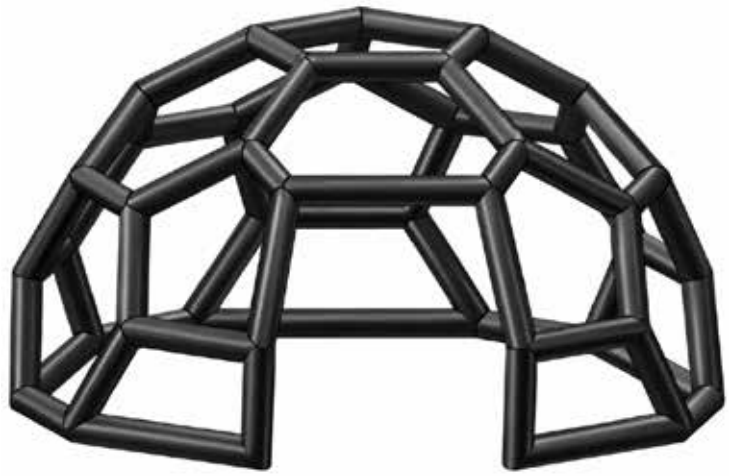
INFLATABLE DISPLAYS

PRODUCT CODE: BRZ-IGLOO

INDOOR USE | OUTDOOR USE



Flight Case

1200W Electric Pump
Includes hose + attachments to inflate tent frame

PRODUCT DESCRIPTION

Create a spacious, eye-catching outdoor environment with the Breeze Inflatable Igloo Tent. Featuring a distinctive igloo-inspired shape and an expansive footprint, this inflatable tent provides plenty of covered space for outdoor events, brand activations, festivals, hospitality areas, and promotional displays.

Measuring approximately 236” W × 236” D × 126” H (19.7’ W × 19.7’ D × 10.5’ H), the Breeze Inflatable Igloo Tent offers a large, open interior while its rounded profile creates a unique look that stands out at any event.

Setup is quick and convenient, with an approximate inflation time of just 10 minutes using an electric air pump. Once fully inflated, the pump can be disconnected, eliminating the need for continuous airflow or a constantly running blower. Included ropes and ground stakes help secure the tent in place during outdoor use, providing additional stability.

The tent features a custom-printed graphic cover with an integrated zippered entrance. Two vertical zippers allow the front door panel to open or close as needed, providing convenient access and added enclosure. For an open entrance, the door panel can be rolled up and secured at the top, creating an inviting entryway while keeping the graphic neatly tucked away. Two transparent TPU hexagonal windows, positioned on each of the rear sides, allow natural light into the tent while providing visibility to the surrounding environment.

For secure transportation and storage, both the graphic package and hardware-only configurations ship exclusively in a durable wheeled flight case. The flight case provides added protection for the tent components during shipping, handling, and storage between events.

**For outdoor inflation of the frame where a power outlet is unavailable, we recommend utilizing a portable power generator to power the electric air pump. Alternatively, a power inverter for vehicle 12V outlets is also an effective solution*

DISPLAY DIMENSIONS

236” W × 236” D × 126” H	19.7’ W × 19.7’ D × 10.5’ H

GRAPHIC MATERIAL

500D UV Resistant Dye Sub Inflatable Tent Fabric

GRAPHIC FINISHING

Each printed graphic is carefully stitched with reinforced seams for durability and a clean, professional finish. The edges are double-sewn to prevent fraying and ensure a snug, smooth fit when zipped onto the archway. This craftsmanship guarantees a long-lasting, wrinkle-free display that looks sharp at every event.
