

# 10FT CASITA CANOPY TENTS™ ALUMINUM KIT 2

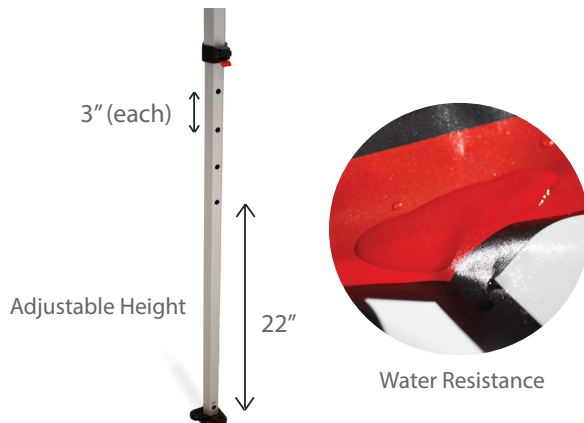

TENTS  
PRODUCT CODE: CAS-10-KIT2

Black Trim

White Trim

## PRODUCT DESCRIPTION

The 10ft Aluminum Casita Kit 2 is a streamlined, fully enclosed canopy solution designed for brands that require maximum graphic coverage and a clean, professional footprint. Built around a lightweight yet durable 10ft aluminum Casita tent frame, this kit offers excellent stability while remaining easy to transport and quick to assemble. The aluminum construction provides long-term durability and corrosion resistance, making it well suited for both indoor and outdoor use. With its modern profile and refined finish, the frame enhances the overall presentation and supports a polished, high-end branded environment.

Included with the kit are three single-sided Casita back walls, creating a more enclosed structure that delivers expanded branding opportunities and added visual impact. This configuration is ideal for creating a defined booth, reducing visual distractions, or providing increased wind and sun protection during outdoor events. A standard tent travel bag is also included to keep components organized and protected during transport and storage. Together, these elements make the 10ft Aluminum Casita Kit 2 a practical and professional solution for events, promotions, and activations that demand strong structure, clear messaging, and efficient deployment.

DISPLAY DIMENSIONS	118.75"W x 135"H x 118.75"D

## SET UP INSTRUCTIONS

### Step 1

Take your frame and slightly expand it open to expose the corner bars.

### Step 2

Take your canopy graphic and place it on top of the frame.

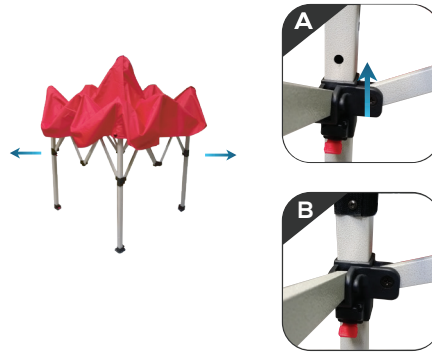

### Step 3

Adhere each corner of the canopy to each corner of the frame. Inside each corner of the canopy, there is a strip of loop Velcro sewn to it and each corner of the frame has a strip of hook Velcro.

### Step 4

With the canopy securely in position, expand the frame until the corner latches lock into place.

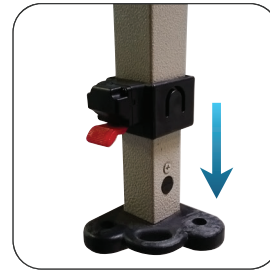

### Step 5

Increase the height by extending the lower legs.

### Step 6

Pull each leg down until the latch locks into place.

### Step 7

Locate the spindle under the canopy, in the middle of the frame. Pull the lever out and rotate to extend the upper peak pole. The dome cap will push out the canopy creating tension to flush out any loose areas.

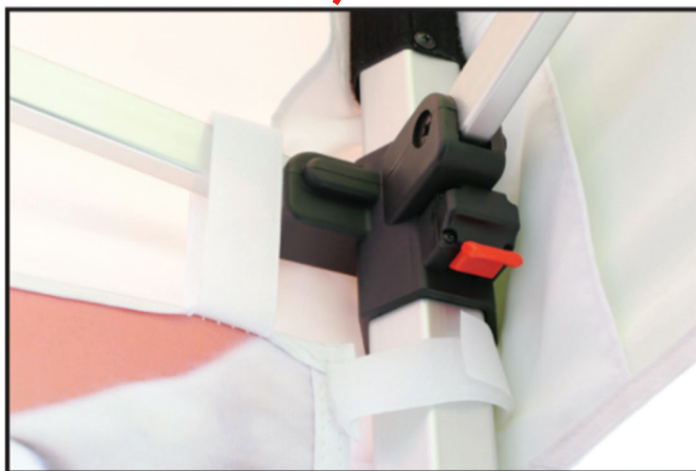

### Step 8

The install is complete.

## ATTACHING BACK WALL

Back Wall Top & Side Straps

1. Set up tent
2. Attach top straps of back wall to the horizontal "X Braces" of tent frame (See photo to left)
3. Once all top straps are connected to the frame, attach the straps on the left and right sides of the wall to the tent legs.
4. Make sure to remove back wall prior to collapsing frame for storage/transport.
