PRODUCT DESCRIPTION

Designed specifically for the 10ft Casita® Canopy steel tent frame, this full backwall kit provides a clean, professional enclosure solution for outdoor events, trade shows, and promotional activations. Constructed with durable tent fabric material and printed using vibrant dye sublimation graphics, the walls deliver high-impact branding while maintaining the premium look and performance of the Casita® canopy system. The compatible tent frame features durable 28mm square steel legs with a white powdercoated finish for added strength and stability.

The complete wall kit includes three full backwalls and one zippered entry wall featuring a center zipper for convenient access into the tent interior. Each wall is equipped with left and right side zippers, allowing all four walls to connect together and fully enclose the canopy space. Tent tops and walls are available with either white or black seam trim and matching zippers for a coordinated appearance. Backwalls attach easily to the tent frame using integrated hook-and-loop straps that secure along the upper x-rod truss system for quick installation and removal. All backwalls are single-sided print only.

For a complete event setup, the enclosure system is also available as a full package that includes the Casita® steel tent frame, printed tent top, frame travel bag, and wall kit. Customers can choose between a configuration with four full walls or a setup featuring three full walls and one zippered wall with a center entry door for added accessibility and convenience. Individual backwalls are also available

DISPLAY DIMENSIONS	118.75"W x 135"H* x 118.75"D
--------------------	------------------------------

*Must be used at max height setting when using zipper walls

GRAPHIC MATERIAL

- Classic Tent Fabric (FAB-TENT)
- Material weight 8.26 oz/yd² - 280 GSM
- Material composition - 73% Polyester / 27% Nylon
- Water Resistant
- UPF 50 + UV Rating
- Meets CPAI-84, NFPA 71, & CA Title 19 Requirements

TENT TOP GRAPHIC FINISHING

Hemmed around panels w/white or black trim on seams. Velcro sewn to insides of each valance corner and reinforcement sewn inside of peak.

ZIPPER WALL GRAPHIC FINISHING

Hemmed around perimeter with white or black trim to match tent top. 5 hook and loop straps are added along the top and 3 to left and right sides to attach wall to tent frame. A double headed zipper is added to the right side to attach to other walls.

ZIPPER DOOR GRAPHIC FINISHING

Hemmed around perimeter with white or black trim to match tent top. 5 hook and loop straps are added along the top and 3 to left and right sides to attach wall to tent frame. A double headed zipper is added to the right side to attach to other walls and another down the middle to create the doorway.

SET UP INSTRUCTIONS

Step 1

Take your frame and slightly expand it open to expose the corner bars.

Step 2

Take your canopy graphic and place it on top of the frame.

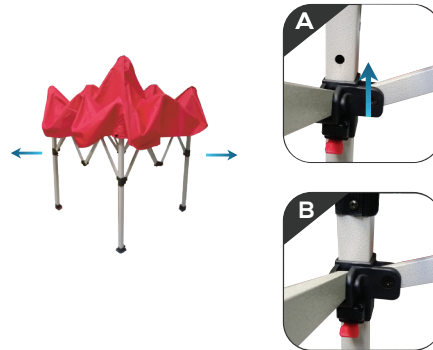

Step 3

Adhere each corner of the canopy to each corner of the frame. Inside each corner of the canopy, there is a strip of loop Velcro sewn to it and each corner of the frame has a strip of hook Velcro.

Step 4

With the canopy securely in position, expand the frame until the corner latches lock into place.

Step 5

Increase the height by extending the lower legs.

Step 6

Pull each leg down until the latch locks into place.

Step 7

Locate the spindle under the canopy, in the middle of the frame. Pull the lever out and rotate to extend the upper peak pole. The dome cap will push out the canopy creating tension to flush out any loose areas.

Step 8

The install is complete.

ATTACHING WALLS

Back Wall Top & Side Straps

1. Set up tent and extend legs to maximum height.
2. Attach top straps of back wall to the horizontal "X Braces" of tent frame with the graphic side facing out. (See photo to left)
3. Next attach the straps on the left and right sides of the wall to the tent legs.
4. Repeat process for all walls.
5. Zip the left and right sides of the walls together. Zipper head is on the right side of the wall.
6. Make sure to remove back wall prior to collapsing frame for storage
