

HALF HARD CASE

The Half Hardcase is a durable and dependable transport solution designed for trade shows, exhibits, and portable displays. Constructed from rugged blow-molded polyethylene (PE) plastic, this hard carry case is built to withstand the rigors of travel while protecting your display components.

This sleek, compact case features inset wheels for effortless mobility and two ergonomic handles for versatile transport options—one located on the backside of the lid for vertical rolling, and another centered on the front for horizontal carrying. The hinged lid includes a front locking latch, ensuring secure closure during transit.

To enhance your presentation, an optional stretch fabric graphic wrap is available. Printed using high-resolution dye sublimation, the graphic wrap transforms the case into a branded podium or display stand. The graphic slides easily over the top of the case and stretches down around the base, with an elastic cord sewn into the bottom hem to keep it snug and in place.

Whether used for transportation or as a part of your booth presentation, the Half Hardcase combines functionality with promotional potential.
