

LUMIÈRE LIGHT WALL 3X3 DUAL EDGE LIGHT KIT

LUMIÈRE LIGHT WALL
PRODUCT CODE: LLW-EL3X3

PRODUCT DESCRIPTION

Streamlined Illumination for Lumière Lightbox Frames
The Lumière Dual Edge Lights are a simplified, high-impact edge lighting solution designed specifically for the Lumière Lightbox frame system. Offering a smart alternative to traditional LED ladder lights, these edge lights provide brilliant, even illumination while dramatically reducing setup time and logistical costs.

Engineered for convenience, the LED light strips easily clip into the bottom edge of the Lumière frame, and can also be mounted to the top edge for enhanced brightness and even greater graphic visibility. A top blackout panel is included to fully enclose the frame, helping to contain and diffuse the light for a vibrant, professional display from edge to edge.

Key Features:

Easy to Install – Tool-free clip-in light strips attach directly to the top and/or bottom frame edges

Complete Lightbox Illumination – Includes top blackout panel to contain and diffuse light for bright, even graphic lighting

Enhanced Brightness – Add light strips to both top and bottom edges for maximum illumination

Efficient Shipping – Fewer components means less packaging and lower shipping costs

Cost-Effective – A budget-friendly upgrade to standard LED ladder light kits

Portable Design – Comes with a compact travel bag for organized transport

Compatibility:

Compatible with Lumière Lightbox frames up to 7.5ft x 7.5ft in size or smaller.

Choose Lumière Dual Edge Lights for a cleaner, lighter, and more economical lighting solution—without compromising on visual impact.

PARTS LIST

Qty 3 - Dual Edge Light Strips

Qty 2 - Y Cables

Qty 2 - Transformers

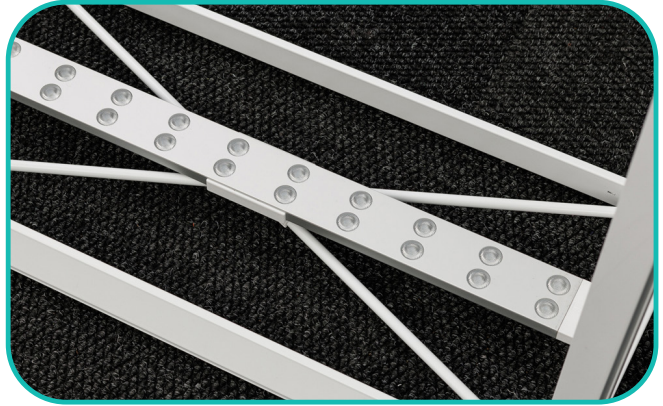

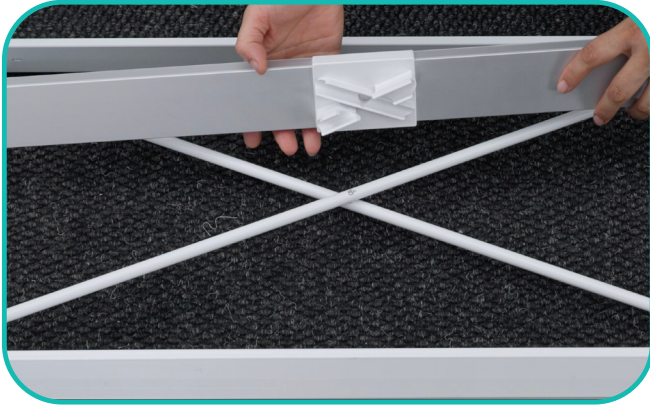

Qty 1 - LED Light Travel Bag

Qty 1 - Top Blockout Panel

Dual Edge Light Installation

a. Clip dual edge lights to bottom X braces of frame. There should be 1 light strip per section of the frame. Dual edge lights can also be added to the top row of the frame for added brightness.

b. Plug Y cables into ports on the ends of the edge light strips. One Y cable will connect two led strips together and the only will attach to one. Plug each Y cable into the transformers to complete dual edge light wiring.
