

VAIL 120DB 20ft Non Backlit

The VAIL-120DB freestanding display is an impressive 20ft wide solution crafted from silver anodized aluminum, making it both durable and stylish. Designed with the VAIL-120DB profile, which is 120mm (4.7 inches) wide, this display accommodates custom dye-sublimated fabric graphics with SEG (Silicone Edge Graphics) finishing, allowing for effortless installation and graphic change-outs. Perfect for large presentations, it supports both single- and double-sided graphics.

Available in 8ft and 10ft heights, the frame is equipped with side-mounted and bottom-mounted feet for enhanced stability, even at its largest sizes. For those who require backlit options, additional lighting configurations can be integrated. This versatile display is ideal for exhibitions, trade shows, and retail environments where impactful visuals are essential.

OVERVIEW

HARDWARE DETAILS

The lightbox frame is made from the VAIL-120DB Resort Extrusion profile. The VAIL-120DB is a 120mm/4.7in wide silver anodized aluminum extrusion profile designed for double sided graphic display and accepts 12mm x 3mm keder (silicone beading)

Each frame features 2 feet Side Mounted Feet (VAIL-SF) which are 24in L x 4in W. Each foot attaches to the frame via 2 bolts w/wing nuts enabling a quick tool free installation.

Each frame features 2 feet Bottom Mounted Feet (VAIL-BF) which are 24in L x 4in W. Each foot attaches to the frame via 2 bolts w/wing nuts enabling a quick tool free installation.

Tool free corner locks (RESORT-TFCRNR) are utilized to connect the bottom corners of the frame. Simply slide the lock into the spines of the VAIL-120DB profiles and press down levers to lock them into place.
