SINGLE SIDED

INDOOR USE

PRODUCT DESCRIPTION

The Raven 33.5” Retractable Banner Stand is a sleek, economical display solution designed for retail promotions, trade shows, events, and point-of-purchase advertising. It features a fixed 33.5” W x 80” H display area for UV-printed Super Flat Vinyl graphics, delivering vibrant colors and a smooth, professional presentation. The fixed graphic height provides a clean, consistent appearance every time the display is set up.

Built with a durable black PVC base, the Raven combines lightweight portability with dependable performance. The display is supported by a black aluminum support pole and a hybrid clamp bar constructed from both PVC and aluminum for added strength. Two swivel feet fold out from the base to provide extra stability during use, while the integrated plastic leader panel secures the graphic with double-sided adhesive tape. Since the graphic is permanently mounted to the hardware, graphic change-outs are not recommended.

Every Raven Retractable Banner Stand includes a black travel bag with carry handles for convenient transportation and storage. For enhanced visibility, an optional 50W arm light is available and mounts to the top of the support pole to illuminate the graphic from the front, helping your message stand out in a variety of display environments.
