

SHOWBIRD 120 20 X 10 CONFIGURATION F

SHOWBIRD 120 MODULAR LIGHTBOX
PRODUCT CODE: SB120-2010-F

TRAVEL BAGS
INCLUDES QTY 9

PRODUCT DESCRIPTION

The Showbird 120 is a premium modular lightbox display system designed to deliver bold, evenly illuminated graphics with maximum flexibility. Built with 120mm wide anodized silver aluminum extrusion profiles, this system features LED edge lighting integrated into both the top and bottom frame profiles, creating vibrant, high-impact backlit visuals. The Showbird 120 displays dye sublimated backlit fabric graphics with SEG (silicone edge graphic) finishing, ensuring a smooth, wrinkle-free presentation suitable for trade shows, retail environments, and branded interiors.

Engineered for efficiency, the Showbird 120 offers tool-free assembly and a modular design that allows multiple frames to be combined into custom configurations. A variety of standard configurations and frame sizes are available to accommodate common layout needs, while custom multi-frame configurations can be created by connecting standard components. Frame sizing itself cannot be customized, ensuring structural integrity and consistent performance across all setups.

The Showbird 120 is available as a single- or double-sided display. Single-sided graphic packages include a printed front graphic with a blackout panel on the backside, while double-sided options feature printed graphics on both sides of the frame for 360° visibility. Each frame includes travel bags for hardware, making transport and storage simple and secure. To enhance functionality, optional monitor mounts and shelving accessories are available, allowing the system to adapt seamlessly to interactive and product-focused display applications.

DISPLAY DIMENSIONS	236.22"W x 96"H x 118.11"D
GRAPHIC MATERIAL	Dye Sub Backlit Fabric
POWER OUTLETS	Requires 9 Power Outlets

GRAPHIC FINISHING

12mm x 3mm silicone beading is sewn around the perimeter of the fabric graphic (Silicone Edge Graphic - SEG). Silicone beading is hidden from view once installed. A pull tab is added to a bottom corner to help with graphic removal.

DISPLAY CONSTRUCTION

Aluminum frame with plastic components. LED edge lights run along the top and bottom profiles of the frame.

CONFIGURATION ASSEMBLY ELEVATED FRAMES

SB120-STACK-B

SLIDE THE SB120-STACK-B CONNECTOR ONTO THE POSTS OF THE VERTICAL PROFILES, ENSURING THE CONNECTOR IS POSITIONED ON THE OUTSIDE OF THE FRAME.

ATTACH THE TOP VERTICAL PROFILE BY SLIDING IT DOWN ONTO THE POSTS TO SECURE THE CONNECTOR IN PLACE. REPEAT THIS PROCESS FOR THE SECOND SUPPORTING FRAME.

POSITION THE SUPPORTING FRAMES SO THEY ALIGN WITH THE ENDS OF THE ELEVATED FRAME. LIFT THE ELEVATED FRAME AND REST IT ONTO THE POSTS OF THE SB120-STACK-B CONNECTORS. ENSURE THE CONNECTORS INSERT INTO THE SAME HOLES USED FOR THE FRAME FEET. REPEAT PROCESS FOR BACKWALL FRAMES, LEFT RETURN, AND RIGHT RETURN.
