PRODUCT DESCRIPTION

Expand Your Lightbox Potential – One Meter at a Time

The Showbird 65 1M Extension Kit is a seamless solution for expanding your existing Showbird 65 Modular Lightbox display. Designed for compatibility and simplicity, this kit includes all the essential components required to extend your current display by 1 meter (39.4 inches) in width—without compromising structural integrity or lighting performance.

Whether you're working with the SB65-200x240 or SB65-300x240 frames, this extension kit enables you to create a stunning, uninterrupted display up to 4 meters (157.5 inches) wide. Ideal for trade show booths, retail environments, and branded activations that demand flexibility and scale.

Kit Includes:

- Top & Bottom Horizontal Profiles – Precision-fit 65mm aluminum extrusions for extended structural support.
- Vertical Support Profiles – Connect seamlessly to your existing frame for clean, uniform height alignment.
- LED Light Panel – High-efficiency LED ladder lights mounted to a blackout panel, providing bright and even backlighting across the added width.
- Transformer – Pre installed on bottom horizontal profile for plug and play use

Key Features:

- Compatible with SB65-200x240 and SB65-300x240 lightbox frames
- Tool-Free Integration with your existing Showbird 65 setup
- Modular & Scalable – Easily extend your display to fit larger exhibit spaces
- Vibrant Illumination using the same backlit technology found in the full-size frames
- Professional Finish that matches your current Showbird 65 profile aesthetics

Ideal for exhibitors and marketers who want to grow their visual footprint without starting from scratch, the Showbird 65 1M Extension Kit makes it easy to scale your display—brilliantly, and modularly.
