USE

## PRODUCT DESCRIPTION

The Showbird 65 180° Connector - Top is a durable aluminum bracket designed to join two Showbird 65 lightbox frames seamlessly side by side, forming a clean 180° linear connection from the top. Built for stability and alignment, this connector ensures structural integrity while maintaining the minimalist elegance of the Showbird 65 system.

This top-mounted connector features a dual-slot design engineered to align perfectly with the internal channeling of adjoining lightbox frames. When paired with the 180° Connector - Foot, it provides a complete top-to-bottom connection solution, ideal for continuous backwall configurations or linear modular displays.

### Key Features:

- Connects two Showbird 65 lightbox frames at the top in a 180° straight-line setup
- Heavy-duty aluminum construction with clean weld seams
- Precision-fit dual slots for secure channel alignment
- Designed for fast, tool-free integration
- Complements the Showbird 65 180° Connector - Foot for full-frame connection

Ensure a stable and polished display with the Showbird 65 180° Connector - Top—purpose-built for modular versatility and exhibition-grade performance.
