USE

PRODUCT DESCRIPTION

The Showbird 65 90° Corner Connector - Top is a durable aluminum bracket engineered to securely join two Showbird 65 lightbox frames at a precise 90-degree angle from the top. Designed to pair with the corresponding foot connector, this top-mounted solution creates a strong, seamless corner connection ideal for L-shaped booth designs and corner display structures.

Crafted with a dual-channel configuration at a right angle, the connector aligns with the internal track of each frame, ensuring flush integration without visible gaps. Its rugged construction provides both visual cohesion and structural reinforcement, making it a critical component for any modular lightbox setup that incorporates angular transitions.

Key Features:

- Connects two Showbird 65 lightbox frames at a 90° corner from the top
- Sturdy aluminum construction with precision-welded joints
- Right-angle dual-slot design for perfect frame alignment
- Enables seamless and stable corner configurations
- Complements the Showbird 65 90° Corner Connector - Foot for full-frame support

Elevate the functionality and design potential of your modular display with the Showbird 65 90° Corner Connector - Top—built for clean corners and lasting performance.
