## PRODUCT DESCRIPTION

### Monitor Mounting Plate for Showbird 65 100x240 Frames

The Showbird 65 TV Mount is a steel monitor mounting plate designed to integrate a TV or monitor into your Showbird 65 modular display. Compatible exclusively with Showbird 65 100x240 frames, this plate slides directly into the internal slots of the vertical profiles, providing a stable and reliable mounting point for digital screens up to 39 inches and 17 lbs.

The mount features a slotted backplate that accepts a wide range of standard monitor wall brackets (not included). To complete installation, users must cut holes in the printed SEG graphic to expose the mounting plate and attach their monitor bracket. This low-profile mounting solution is ideal for adding motion graphics, looping video, or digital presentations within a clean, fabric-wrapped environment.

### Key Features:

- Compatible only with Showbird 65 100x240 frame profiles
- Slides into interior frame slots for clean, concealed mounting
- Supports monitors up to 39" and 17 lbs
- Requires holes in graphics for bracket access
- Showbird 65 100x240 frame, monitor, and monitor wall mount not included
- Ideal for digital integration in trade show and retail environments

Enhance your exhibit with integrated digital media using the Showbird 65 TV Mount—a streamlined solution for embedding screens into SEG fabric lightbox displays.
