

# SEGO® ARCH BRACKET

SEGO MODULAR LIGHTBOX DISPLAY

PRODUCT CODE: SEGO-AB-225

## PRODUCT DESCRIPTION

The SEGO® Arch Bracket is a specialized accessory designed exclusively for SEGO® Modular Lightbox frames, enabling the creation of stunning elevated archway configurations. This unique bracket connects SEGO® frames to form an open archway, delivering an eye-catching visual feature that enhances the impact of any booth or exhibit space.

To construct the archway configuration, the system requires two SEGO® 100x225 frames and one SEGO® 100x200 frame (frames sold separately). The SEGO® Arch Bracket secures the top arch frame while maintaining a visible opening between the top arch and the supporting SEGO® 100x200 frame, producing a sleek, modern architectural look.

Please note: To install the SEGO® Arch Bracket, two holes must be cut into the graphic on the bottom (viewable side) of the top archway frame to accommodate the bracket supports. This ensures seamless integration without compromising the graphic's tension or display quality.

With its precise engineering and clean finish, the SEGO® Arch Bracket is an essential solution for designers and exhibitors seeking to elevate their SEGO® Modular Lightbox setups with architectural creativity and visual appeal.

## CONNECTOR CONSTRUCTION

Aluminum Bracket

## REQUIRED DISPLAYS/CONNECTORS TO MAKE ARCH

|                                |                     |
