

SEGO® BRIDGE CONNECTOR

SEGO MODULAR LIGHTBOX DISPLAY

PRODUCT CODE: SEGO-BC

PRODUCT DESCRIPTION

The SEGO® Bridge Connector is a precision-engineered accessory designed to transform individual SEGO Modular Lightbox frames into a stunning overhead bridge display. Specifically crafted for use with three SEGO 100 × 225 cm frames (sold separately), this connector system allows exhibitors to create dynamic, multi-dimensional booth configurations that elevate brand presence on the show floor.

Each bridge connection requires four (4) SEGO-BC bridge connectors, ensuring a secure and stable assembly between the vertical and horizontal lightbox frames. The result is an illuminated archway effect that draws attention and enhances the visual impact of your exhibit space.

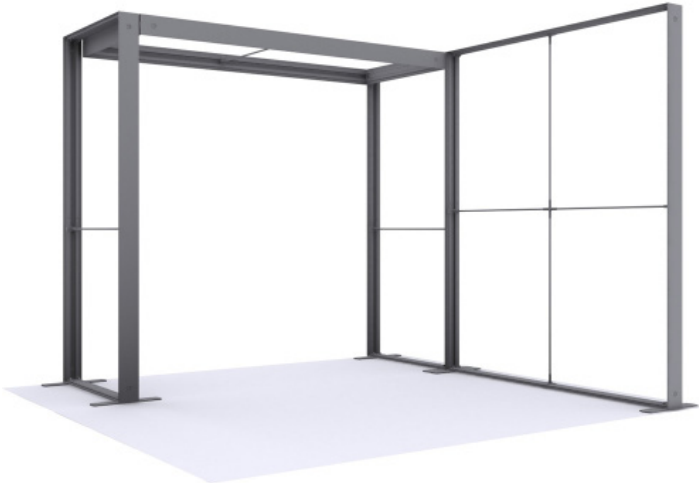

Ideal for trade shows, retail environments, and promotional events, the SEGO Bridge Connector offers seamless integration with the SEGO system's signature tool-free setup, embedded LED edge lighting, and SEG fabric graphics. Whether used for product showcases, branded environments, or interactive walk-throughs, this access
