

SEGO® INSIDE L CONNECTOR

SEGO MODULAR LIGHTBOX DISPLAY

PRODUCT CODE: SEGO-ILCON

PRODUCT DESCRIPTION

The SEGO Inside L Connector is a specialized accessory used with the SEGO Modular Lightbox Display system. Its purpose is to join two SEGO frames at a 90-degree interior angle (inside corner) to create seamless corner configurations for booth or display setups.

Used when you want to build L-shaped or corner display setups, such as corner booths, towers, or multi-panel arrangements where two SEGO lightboxes meet at an internal 90° angle.

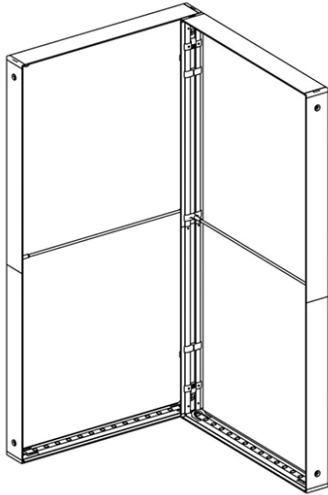

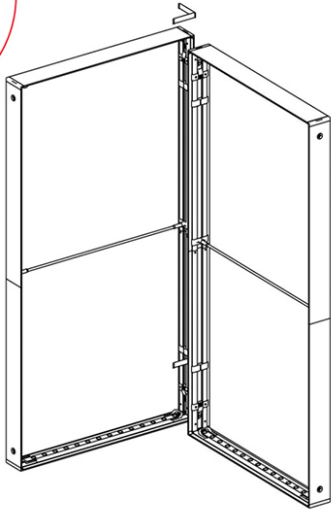

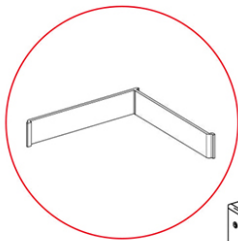

Ideal for use in custom booth layouts, retail displays, or branded environments, the SEGO Inside L Connector helps transform standard SEGO components into dynamic, eye-catching exhibits with minimal effort and tool-free assembly.
