

VERSALUME COLLAPSIBLE LIGHTBOX COUNTER

VERSALUME LIGHTBOXES
PRODUCT CODE: VERSA-LB_CNTR

HARDWARE ONLY

PRODUCT DESCRIPTION

The VersaLume Collapsible Lightbox is a sleek, illuminated display system designed for fast setup and impactful brand presentation. Constructed with a durable 80mm silver anodized aluminum frame, the system features integrated LED edge lighting that produces bright, even illumination across the entire graphic surface. Its innovative folding design allows the display to set up and collapse in seconds, making it an ideal solution for trade shows, retail environments, events, and portable marketing displays.

Graphics are printed using dye sublimated Silicone Edge Graphics (SEG) fabric, delivering vibrant color and a smooth, frameless appearance. SEG graphics install quickly by pressing the silicone edge into the frame channel for a tight, wrinkle-resistant finish. The display is available in single-sided or double-sided configurations: single-sided units include a printed front graphic with a blackout back panel to prevent light bleed, while double-sided options feature graphics on both sides for visibility from multiple directions.

Designed for versatility, the VersaLume product line offers both freestanding displays and counter configurations to suit a variety of exhibit layouts. Each hardware kit includes a travel bag for convenient storage and transport, making VersaLume a professional, portable backlit display solution that combines premium illumination, quick assembly, and modern design.

DISPLAY DIMENSIONS	40"W x 39.5 "H x 16"D
GRAPHIC MATERIAL	Dye Sub Backlit Fabric
POWER OUTLETS	Requires 1 Standard Power Outlet
COUNTER TOP DIMS	40" W x 10" D
COUNTER WEIGHT LIMIT	10 lbs

GRAPHIC FINISHING

12mm x 3mm silicone beading is sewn around the perimeter of the fabric graphic (Silicone Edge Graphic - SEG). Silicone beading is hidden from view once installed. A pull tab is added to a bottom corner to help with graphic removal.

DISPLAY CONSTRUCTION

80mm wide aluminum profile frame with plastic components. LED edge lights line the inside of the vertical profiles with the transformer mounted to the bottom profile. The transformer is concealed by an aluminum plate cover for a clean, finished appearance.
